# **GUJARAT TECHNOLOGICAL UNIVERSITY**

# ANALYSIS AND DESIGN OF ALGORITHMS **SUBJECT CODE:** 2150703 B.E. 5<sup>th</sup>SEMESTER

Type of course: NA

**Prerequisite:** Programming (C or C++), Data and file structure

**Rationale:** Obtaining efficient algorithms is very important in modern computer engineering as the world wants applications to be time and space and energy efficient. This course enables to understand and analyze efficient algorithms for various applications.

# **Teaching and Examination Scheme:**

Teaching Scheme C			Credits	Examination Marks				Total		
L	T	P	C	Theory Marks		Practical Marks		Marks		
				ESE	PA (M)		ESE (V)		PA	
				(E)	PA	ALA	ESE	OEP	(I)	
4	0	2	6	70	20	10	20	10	20	150

#### **Content:**

Sr	Course content	Total Hrs	%Wei
No			ghtage
1	Basics of Algorithms and Mathematics:	02	2
	What is an algorithm?, Mathematics for Algorithmic Sets, Functions and		
	Relations, Vectors and Matrices, Linear Inequalities and Linear Equations.		
2	Analysis of Algorithm:	08	10
	The efficient algorithm, Average, Best and worst case analysis, Amortized		
	analysis, Asymptotic Notations, Analyzing control statement, Loop		
	invariant and the correctness of the algorithm, Sorting Algorithms and		
	analysis: Bubble sort, Selection sort, Insertion sort, Shell sort Heap sort,		
	Sorting in linear time: Bucket sort, Radix sort and Counting sort		
3	Divide and Conquer Algorithm:	06	15
	Introduction, Recurrence and different methods to solve recurrence,		
	Multiplying large Integers Problem, Problem Solving using divide and		
	conquer algorithm - Binary Search, Max-Min problem, Sorting (Merge		
	Sort, Quick Sort), Matrix Multiplication, Exponential.		
4	Dynamic Programming:	05	20
	Introduction, The Principle of Optimality, Problem Solving using		
	Dynamic Programming – Calculating the Binomial Coefficient, Making		
	Change Problem, Assembly Line-Scheduling, Knapsack problem, All		
	Points Shortest path, Matrix chain multiplication, Longest Common		
	Subsequence.		
5	Greedy Algorithm	05	20
	General Characteristics of greedy algorithms, Problem solving using		

	Greedy Algorithm - Activity selection problem, Elements of Greedy Strategy, Minimum Spanning trees (Kruskal's algorithm, Prim's algorithm), Graphs: Shortest paths, The Knapsack Problem, Job Scheduling Problem, Huffman code.		
6	Exploring Graphs:  An introduction using graphs and games, Undirected Graph, Directed Graph, Traversing Graphs, Depth First Search, Breath First Search, Topological sort, Connected components,	04	10
7	Backtracking and Branch and Bound: Introduction, The Eight queens problem, Knapsack problem, Travelling Salesman problem, Minimax principle	03	5
8	String Matching: Introduction, The naive string matching algorithm, The Rabin-Karp algorithm, String Matching with finite automata, The Knuth-Morris-Pratt algorithm.	03	8
9	Introduction to NP-Completeness: The class P and NP, Polynomial reduction, NP- Completeness Problem, NP-Hard Problems. Travelling Salesman problem, Hamiltonian problem, Approximation algorithms	05	10

# Suggested Specification table with Marks (Theory):70

Distribution of Theory Marks								
R Level	U Level	A Level	N Level	E Level	C Level			
10	30	10	10	5	5			

Legends: R: Remembrance; U: Understanding; A: Application, N: Analyze and E: Evaluate C: Create and above Levels (Revised Bloom's Taxonomy)

Note: This specification table shall be treated as a general guideline for students and teachers. The actual distribution of marks in the question paper may vary slightly from above table.

#### **Reference Books:**

- 1. Introduction to Algorithms, Thomas H. Cormen, Charles E. Leiserson, Ronald L. Rivest and Clifford Stein, PHI.
- 2. Fundamental of Algorithms by Gills Brassard, Paul Bratley, PHI.
- 3. Introduction to Design and Analysis of Algorithms, Anany Levitin, Pearson.
- 4. Foundations of Algorithms, Shailesh R Sathe, Penram
- 5. Design and Analysis of Algorithms, Dave and Dave, Pearson.

#### **Course Outcome:**

After learning the course the students should be able to:

- 1. Analyze the asymptotic performance of algorithms.
- 2. Derive and solve recurrences describing the performance of divide-and-conquer algorithms.
- 3. Find optimal solution by applying various methods.
- 4. Apply pattern matching algorithms to find particular pattern.
- 5. Differentiate polynomial and nonpolynomial problems.

6. Explain the major graph algorithms and their analyses. Employ graphs to model engineering problems, when appropriate.

# **List of Experiments:**

- Implementation and Time analysis of sorting algorithms.
   Bubble sort, Selection sort, Insertion sort, Merge sort and Quicksort
- 2. Implementation and Time analysis of linear and binary search algorithm.
- 3. Implementation of max-heap sort algorithm
- 4. Implementation and Time analysis of factorial program using iterative and recursive method
- 5. Implementation of a knapsack problem using dynamic programming.
- 6. Implementation of chain matrix multiplication using dynamic programming.
- 7. Implementation of making a change problem using dynamic programming
- 8. Implementation of a knapsack problem using greedy algorithm
- 9. Implementation of Graph and Searching (DFS and BFS).
- 10. Implement prim's algorithm
- 11. Implement kruskal's algorithm.
- 12. Implement LCS problem.

### Design based Problems (DP)/Open Ended Problem:

- 1. From the given string find maximum size possible palindrome sequence
- 2. Explore the application of Knapsack in human resource selection and courier loading system using dynamic programming and greedy algorithm
- 3. BRTS route design, considering traffic, traffic on road, and benefits

**ACTIVE LEARNING ASSIGNMENTS**: Preparation of power-point slides, which include videos, animations, pictures, graphics for better understanding theory and practical work – The faculty will allocate chapters/ parts of chapters to groups of students so that the entire syllabus to be covered. The power-point slides should be put up on the web-site of the College/ Institute, along with the names of the students of the group, the name of the faculty, Department and College on the first slide. The best three works should submit to GTU.
